# New BTEC’s at Innovate Dorset.

### Available September 2025 through Innovate Dorset

## BTEC WorkSkills Level 1.

At Innovate Dorset, we're proud to offer the **BTEC WorkSkills Level 1** as part of our **Level Up post-16 programme**. This practical and supportive pathway is designed to help young people build confidence, independence, and employability.

This nationally recognised qualification equips learners with essential life and work skills, enabling them to progress towards further education, training, or supported employment. From communication and teamwork to problem-solving and managing money, the WorkSkills qualification lays a solid foundation for success in adult life.

Delivered in a nurturing, inclusive environment by experienced staff, this programme is ideal for learners who need an accessible, hands-on route to gaining a formal qualification. It's a valuable addition to any young person's CV and a stepping stone for those who may not thrive in traditional academic settings.

We welcome referrals from local authorities, schools, and other agencies supporting young people aged 16 and over who would benefit from an alternative education and personal development approach.

## BTEC Level 1 Award in Personal Growth and Wellbeing

At Innovate Dorset, we deliver the **BTEC Level 1 Award in Personal Growth and Wellbeing**, a nationally recognised qualification that empowers young people to better understand themselves, their relationships, and the world around them.

This accredited course is designed to support and enhance existing PSHE provision, while aligning closely with the government's statutory requirements for Relationships and Sex Education (RSE). It provides learners with structured opportunities to explore topics such as self-esteem, resilience, emotional wellbeing, goal setting, and healthy relationships.

Suitable for learners in **Key Stage 4 and post-16 settings**, the BTEC encourages reflection, confidence-building, and positive life choices. It’s particularly valuable for those who may benefit from a more holistic, wellbeing-focused approach to learning and personal development.

Through practical tasks and accessible assessment, learners gain skills that are directly transferable to everyday life, future education, and employment pathways.
